CONTENTS FOR

FLUID MECHANICS–Soviet Research

Volume 1, Nos. 1-6, 1972

Number 1

i **Message from the Editors**

1 **The Development of Physico-Chemical Mechanics**
P. A. Rebinder

4 **The Mechanical Behavior during Shearing of a Disperse System in an Electric Field**
A. V. Luikov, Z. P. Shul'man, R. G. Gorodkin, A. D. Matsepuro and Sh. M. Mitel'man

13 **Probability Requirements in the Formulation of Rheological Equations of Structured Systems**
A. I. Nakorchevskii

19 **The Mechanism of the Anomalous Viscosity of Disperse Systems in the Zone of Small Shear Stresses**
G. M. Bartenev and N. V. Emilova

25 **The Use of Rheoviscometers in Studying the Rheological Properties of Polymer Solutions and Their Changes during Processes Involving Separation into Two Phases**
T. F. Nikulina and I. N. Vlodavets

35 **Rheological Features of the Thinning Process of Free Liquid Films**
M. M. Bashkirov, V. Ya. Khentov, V. I. Garshin and A. N. Vishnevetskaya

40 **An Experimental Investigation of Capillary Wicking in a Magnetic Field**
S. G. Romanovskii and E. A. Raskina

47 **Motion of Particles behind an Oblique Shock in a Two-Phase Supersonic Flow past a Wedge**
G. A. Saltanov and A. V. Kurshakov

54 **The Flow of a Viscoelastic Medium in Constant-Cross Section (Rectangular) Tubes**
A. S. Morozov, Ye. K. Borisenkova and G. V. Vinogradov

61 **Numerical Analysis of the Fluctuations of a Gas Cavity in a Compressible Fluid**
V. M. Lyuboshits and V. Ye. Pervushin

71 **Effect of Free-Stream Variables and Wall Temperature on Flow Behavior in the Pre-Separation Zone of a Laminar Boundary Layer**
V. V. Vasyukov

78 **The Boundary Layer of Non-Newtonian Power-Law Fluids with Arbitrary Pressure Gradients**
A. Sh. Dorfman and V. K. Visnevskiy

85 **Spectroscopic Determination of the Rotational Temperature in a Rarefied Supersonic Flow in Glowing-Discharge Excited Nitrogen**
N. D. Zuyev and V. M. Kalugin

90 **Study of Nonequilibrium Condensation in Supersonic Nozzles and Jets**
L. M. Davydov

99 **Pressure and Temperature behind Blunt Bodies in a Supersonic Flow with Supply of Inert and Reacting Gases to the Base Region**
K. Ye. Yurchenok

110 "Satellite Droplets" Forming during Atomization of Liquids by a Rotating Disk
V. F. Dunskiy, N. V. Nikitin and N. F. Tonkacheyeva
114 Flow Modes during Gravitational Discharge of Bulk Materials
I. I. Kochanova
122 Distribution of Shear Stresses in an Incompressible Turbulent Boundary Layer
N. P. Romanenko and V. G. Kalmykov
130 Determination of the Velocity of Inception of Droplet Entrainment in Two-Phase Flow
R. M. Yablonik and V. A. Khaimov
135 Concerning the Thermal Instability of Fluids in a Centrifugal Force Field
V. D. Khait
142 The Motion of a Spherical Drop in the Flow of a Viscous Fluid
V. Ya. Rivkind, G. M. Ryskin, and G. A. Fishbein
152 Velocity Fields in a Cyclone Separator
V. A. Uspenskii, V. I. Solov'ev, and V. S. Gur'ev
156 Breakup of Liquid Jets and Droplets Conveyed by a Gas Flow
B. Ye. Gel'fand, S. A. Gubin, and S. M. Kogarko
163 Different Kinds of Reynolds Differential Equations for Three-Dimensional Flows of Gaseous Lubricants
N. A. Slezkin
173 The Fluid Dynamics of Convective Stellar Envelopes
N. S. Mel'nikova and I. M. Yavorskaya

Number 2

1 Vapor Bubble Dynamics in Hydrogen Bubble Chambers
V. D. Shestakov and L. G. Tkachev
13 Study of Flow in a Passage in the Presence of Transverse Alternating Pressure Gradients
V. A. Kirpikov and N. N. Petrunina
20 Dimensions and Location of the Mixing Zone of Two Parallel Flows
O. I. Navoznov and A. A. Pavel'yev
25 Application of the Theory and Methods of Design of Hydraulic Loops to Systems with Nonisothermal Gas Flows
A. P. Merenkov, B. L. Krivoshein, Kh. Ya. Rogozhina and L. Ye. Sidler
36 The Frequency of Vapor-Bubble Separation as a Function of Bubble Size
I. G. Malenkov
43 The Escape of a Flat Jet of Air into a Dead-End Tube
E. P. Dyban, A. I. Mazur and E. Ya. Depik
50 Phase Slippage in Pneumatic Transport in a Dense Layer
M. B. Rivkin and V. A. Sorochinskii
56 Physical Processes during Electrostatic Atomization of Liquids
T. K. Burayev and I. P. Vereshchagin
67 Calculation of Hydrodynamic Flow Processes in Pneumatic Conveyance Systems for Containerized Cargo
M. V. Lur'ye and V. L. Gol'dzberg
74 Results of Hydraulic Resistance Measurements during the Flow of Dust-Containing Air in Pipes
F. F. Tsvetkov and R. V. Kerimov
79 On the Stability of a Liquid Surface in an Electrostatic Field
Yu. G. Abrosimov, V.P. Isachenko and A.P. Solodov
85 Transfer Phenomena in Low-Temperature Plasma
A. V. Lykov, L. T. Polak and T. L. Perel'man
95 III All-Soviet Union Conference on Low Temperature Plasma Generators

121 Laminar Flow Stability Problems and the Transition to Turbulent Flow
V. V. Struminskii
135 Calculation of the Secondary Steady-State Flow between Rotating Cylinders
S. N. Ovchinnikova and V. I. Yudovich
141 Diagrammatic Equations for the Degeneration of Turbulence
M. L. Filimonov
146 Calculation of the Principal Characteristics of Turbulent Flows of Non-Linear Stokes Fluids with Lateral Shear
V. E. Aerov and B. A. Kolovandin
155 Differential Equation for the Scale of Turbulence and Calculation of the Turbulent Boundary Layer at a Flat Plate
G. S. Glushko
163 Calculation of the Statistical Characteristics of the Surface Pressure Fluctuations from the Second Moments of the Longitudinal Velocity Fluctuations in the Boundary Layer
T. N. Krasil'nikov
169 Calculation of the Kinematic Characteristics of a Turbulent Flow with Unsteady Motion

Number 3

1 Turbulence in Dynamic Models of the Atmosphere
S. S. Zilitinkevich and A. S. Monin
28 Calculation of the Coagulation Kinetics of a Polydisperse Emulsion in an Electrostatic Field
V. N. Volkov and I. A. Krylov
35 Determination of the Optimal Parameters of High-Pressure Cryogenic Fluid Storage Systems
V. A. Budnitskiy, B. T. Yerokhin and V. G. Manuylov
40 Non-Linear Modeling Equation for Finite Disturbances
V. P. Krasintskii
44 Generalization of the Semi-Empirical Theory of Turbulence to Flows near Rough Surfaces with Various Modes of Roughness
I. K. Nikitin
53 Turbulence in the Viscous Sublayer near a Plane Wall
B. A. Kader
58 Pressure Fluctuations at the Boundary of a Turbulent Flow
V. M. Ljatkher and L. V. Smirnov
65 The Formation of Regular Components in a Random Field of Turbulent Fluctuations with Unsteady Growth of the Boundary Layer
V. M. Tkachenko
70 Some Characteristics of a Turbulent Boundary Layer with a Positive Pressure Gradient and Injection
P. P. Lugovskoi and B. P. Mironov
76 Some Questions on the Effect of Injection on a Turbulent Boundary Layer
V. P. Mugalev
82 Measurement of the Spectrum of the Longitudinal Component of the Pulsation Velocity in the Turbulent Boundary Layer of a Non-Newtonian Fluid
Yu. F. Ivanyuta, I. D. Zheltukhin and N. A. Sergievskii
91 Hydrodynamic and Thermal Measurements in the Turbulent Boundary Layer at a Plate in a Flow of Drop Liquid
A. A. Zhukauskas, A. A. Shlanchyauskas, P. V. Ulinskas and A. A. Pyadishyus
96 Transport of Solid Particles by Turbulent Flows
N. A. Mikhailova

100 The Degeneration of Turbulence in the Wake of Turbulence-Generating Grids in a Low-Velocity Wind Tunnel
I. Ya. Bitsyutko and V. K. Shchitnikov
104 Problems in the Calculation of a Turbulent Boundary Layer
V. S. Avduevskii and V. N. Kalashnik
115 Turbulent Jets
G. N. Abramovich
130 Turbulent Mixing of Free Gas Jets
L. A. Vulis
136 Experimental Investigation of the Mixing of Isothermal and Non-Isothermal Turbulent Cocurrent Jets in Nozzles
V. L. Zimont
144 The Mixing of Cocurrent Gas Jets of Differing and Like Densities
O. I. Navoznov and A. A. Pavel'ev
150 Calculation of Heat Transfer in a Laminar Flow of a Non-Newtonian Fluid in a Tube with Boundary Conditions of the Second Kind
Yu. Ye. Lukach and Zh. A. Nasonkin
154 A Study of the Interaction of Two Incompressible-Fluid Flows in a Flat Duct
B. L. Zel'dovich and Ye. D. Nesterov
161 A Study of the Speed of Sound in Gases with Solid or Liquid Suspensions
G. A. Mukhachev and O. F. Susekov
171 A Polytropic Process with Friction and Heat Transfer
N. S. Yershov

Number 4

1 The Structure of Turbulent Flows Adjacent to Walls
S. S. Kutateladze
12 Turbulent Free Connection
S. S. Kutateladze
29 Elements of the Hydrodynamics of Gas-Liquid Systems
S. S. Kutateladze
104 Two-Dimensional Flow of an Ideal Incompressible Fluid Past Arbitrarily-Shaped Highly-Cambered Bodies
V. B. Avdeyev
116 Methods for Improving the Anticavitation Properties of Screw Pumps Operating Below Capacity
N. S. Yershov, O. N. Mayorov, B. V. Ovsyannikov, V. S. Selifonov and A. S. Shapiro
125 On the Spectrum of Natural Frequencies of an Elastic-Plate-Fluid System
V. N. Buyvol and Yu. R. Shevchuk
132 Vibrations of a Cylindrical Shell in a Duct Filled with an Ideal Fluid
V. N. Buyvol and B. N. Ostroverkh
140 Effect of Water-Tunnel Walls on Supercavitated Flow Past Profiles
I. E. Yefremov
149 On the Equilibrium of a Cable Connected to a Free-Floating Body Placed in a Stream
V. I. Bukach and I. M. Gorban'
155 A Study of the Transition from Laminar to Turbulent Flow in the Boundary Layer at a Plate in a Model-Testing Tank
L. F. Kozlov
161 Experimental Study of Turbulent Boundary Layer with Suction
M. Ya. Ariye and L. F. Kozlov
166 Experimental Study of the Structure of Turbulent Layers in Incompressible Fluids in the Presence of a Longitudinal Pressure Gradient
A. G. Marchenko
173 Concerning Velocity Distributions in Turbulent Flow at Porous Surfaces
A. G. Baskakova, V. T. Movchan and A. M. Pereverzev

177 Approximate Calculation of a Thermally Stratified Turbulent Boundary Layer in a Region Downstream a Sharp Change in the Roughness of the Surface at Which Flow Takes Place
I. K. Nikitin

Number 5

1 Calculation of Turbulent Mixing of Parallel Flows
I. L. Vulis
6 Structure of the Thermal Perturbations in Turbulent Fluid Flow in a Duct
V. I. Subbotin, M. Kh. Ibragimov, U. P. Bobkov, G. I. Sabelev and V. I. Sidorov
13 Determination of Minimum Losses in the Mixing of Turbulent Cocurrent Jets in Ducts with Profiled Walls
V. S. Makaron and T. P. Kozlova
21 The Integral Method in the Theory of Wall Jets
V. S. Maksimov
30 Two-Dimensional Turbulent Jets at a Porous Wall
A. M. Mkhitaryan and A. P. Girol'
38 Calculation of Supercavitated Flow Past Slender Profiles in a Finite Flow
V. M. Roman
48 On Calculation of Averaged Velocities and Resistance in Unstable [Transient] Turbulent Flow in a Pressurized Rough Channel
Ye. V. Yeremenko and S. B. Markov
59 Use of Polymeric Additives for Reducing Hydraulic Resistance in Pipes
V. A. Bazilevich and A. N. Shabrin
68 Study of Variation in the Characteristics of a Conical Diffuser as a Function of Inlet Conditions
I. A. Fendrikov, V. Ya. Fridland and A. K. Yanko
72 Some Results of Experiments with Conical Diffusers
I. A. Fedrikov and A. K. Yanko
75 In Situ Studies of the Transformation of the Air Flow and Heat Transfer to the Atmosphere from the Surface of Thermal Electric Power Plant Cooling Ponds
V. N. Domanov
81 Turbulent Co-Flows with Zero Excess Momentum
A. S. Ginevskii, L. N. Ukhanova and K. A. Pochkina
87 Diffusion and Vortex Models of the Turbulent Jet
A. G. Prudnikov, V. N. Sagalovich and E. P. Yukina
98 Application of Turbulent Jet Theory to the Analysis of Detached Flow between Two Bodies
A. Ya. Cherkez, Yu. L. Karpov, V. N. Kudryatsev, N. F. Ovchinnikov, Yu. P. Semenkevich and V. A. Shilov
104 Correlation of Equilibrium Turbulent Boundary Layers
A. G. Stetsenko
113 The Variation in Turbulence Energy in Transient Flow
Ye. V. Yeremenko
121 Inverse Problems for Supercavitating Bodies
V. M. Ivchenko and V. M. Roman
130 The Direct Boundary-Value Problem for a Supercavitating Foil with a Finite Cavity
V. M. Roman
138 The Direct Problem for a Supercavitating Airfoil Cascade
V. I. Gubriy
149 Turbulent Flow of a Viscous Incompressible Gas in an Axisymmetric Channel under Conditions of Preliminary Swirl in the Entry Zone
R. Z. Alimov
157 The Nature of Flow during Intensive Blowing Through a Permeable Surface
M. V. Tsvetkova
160 The Measurement of Unsteady Air Flow Rates in Channels by the Hot-Wire Anemometer Method
G. A. Dreitser

164 The Establishment of a Relationship between the Intensity Value and the Dissipation of Energy of Turbulence
B. G. Trusov
170 An Investigation of the Intensity of Turbulence in the Region of the Inflow of a Jet of Secondary Air into the Firing Tube of a Gas Turbine Engine Chamber
G. M. Gorbunov, A. V. Peshkov, I. L. Khristoforov and M. V. Emmil'
176 Investigations of Confined and Open Turbulent Flows at the Institute of Fluid Mechanics, Ukrainian Academy of Sciences
I. L. Rozovskii

Number 6

1 Concerning Interference between a Body and Water-Tunnel Walls
V. M. Ivchenko and G. T. Todorashko
8 Concerning the Unsteady Motion of a Slender Foil Near the Interface between Two Different Fluids
I. I. Yefremov
14 On the Induced Mass of Catamarans
P. G. Avramenko
18 Wave Generation by a Submerged Ellipsoid
Ye. F. Tkalich and N. V. Shaybo
23 Unsteady Laminar Boundary Layer with Suction or Blowing
L. F. Kozlov and A. I. Tsyganyuk
30 A Method for Calculating a Turbulent Boundary Layer in Compressible Gases with Suction
M. Ya. Ariye
38 Turbulent Boundary Layer at a Permeable Surface
M. Ya. Ariye
43 Application of the Modified Shvets-Targ Method for Calculating the Velocity Distribution in Boundary Layers with Suction
L. F. Kozlov
51 Measurement of the Pressure Distribution at the Surface of an Aerodynamic Body Using a Special Interrogator
O. R. Cheranovskiy and V. B. Zozulya
55 Effect of Compressibility on the Flow of Water and Other Substances
I. L. Povkh and G. A. Atanov
65 Region of Existence of Bubble-Type Supersonic Flows of Gas-Liquid Mixtures
Yu. A. Batrak
70 A Model and Hydrothermodynamic Equations of a Multiphase Fluid in the Presence of Phase Transitions
A. F. Babitskiy
80 Concerning the Allowance for Losses Attending the Jet Mixing in Hydrojet Chambers
I. M. Chernyy and N. N. Belokrinitskiy
87 On the Accuracy of the Contact Interaction Hypothesis
I. P. Mel'nichenko
91 Concerning Laws of Variation of Mass on Satisfaction of the Tsiolkovskiy Hypothesis
I. P. Mel'nichenko
94 Scattering of Acoustic Waves at a Cylinder in a Semiinfinite Space
I. T. Selezov and Yu. G. Krivonos
104 A Dynamic Model of the Separated Flow Past a Body with Two-Dimensional Flow in a Duct
M. A. Gol'dshtik and B. A. Silant'yev
111 Experimental Investigations of the Turbulence Properties of Suspension-Bearing Pressure Flows at High Concentration
N. A. Silin and B. F. Ocheret'ko
115 Some Results of Full-Scale Studies of Channel Flow Turbulence
D. I. Grinval'd

121 **Turbulent Transfer in Rotary Flows of an Incompressible Fluid**
B. P. Ustimenko, V. N. Zmeykov and M. A. Bukhman

ATMOSPHERIC TURBULENCE

128 **Structural Features of the Lower Layer of the Atmosphere above the Sea**
R. S. Bortkovskiy and L. Yu. Preobrazhenskiy

132 **The Low-Frequency Limit of the Inertial Interval in the Lower Layer of the Atmosphere**
Z. I. Volkovitskaya and V. N. Ivanov

139 **Spectral Structure of the Turbulence in a Region of Heavy Convective Clouds**
S. M. Schmeter

146 **The Transfer of Energy through the Turbulence Spectrum of the Free Atmosphere**
G. N. Shur

152 **Observation of Turbulence in the Bottom Layer of the Sea**
V. G. Labeish and V. Kh. Burnashev

155 **Experimental Investigation of Turbulent Diffusion in the Sea by the Fluorescent Tracer Method**
R. V. Ozmidov, A. N. Gezentsvei and G. S. Karabashev

160 **Experimental Investigation of the Origin and Development of Turbulence in Tubes**
V. M. Filippov and V. V. Struminskii

167 **Correlation Micro-Pickup for Pressure Fluctuations**
Ye. B. Kudashev

172 **Electrical Instrument for Determining Water-Flow Conditions**
N. A. Gnitetskii, L. F. Kozlov and V. M. Shakalo
